

S-WORKS EXOS 99 ROAD SHOES - LTD

Rocket Red LTD

99 grams-per-shoe. Yes, you read that right: 99 grams. The S-Works EXOS 99 road shoes are the world's lightest production cycling shoes--no IFs, ANDs, or BUTs about it. Of course, they still feature all of our Body Geometry features, are ultra-stiff, and have all the pedigree and performance that S-Works is synonymous with. It's the hardest project we've ever completed, which is why we're only going to produce 500 pairs of them. Ever.

- Body Geometry sole and footbed are ergonomically designed and scientifically tested to boost power, increase efficiency, and reduce the chance of injury by optimizing hip, knee, and foot alignment.
- Our lightest FACT Powerline™ carbon plate maximizes power transfer: Stiffness Index 13.0
- A revolutionary Dyneema® Mesh allows us to achieve weight without sacrificing hold for the ultimate connection and comfort.
- Titanium alloy cleat nuts can rotate to position pedal/cleats 5mm rearwards.
- Non-slip, replaceable heel tread.
- Form Fit last with a Warp Sleeve vamp offers the ultimate in connectivity, comfort, and speed.
- Three-bolt cleat pattern fits all major road pedals.
- Approximate weight: 99g (1/2 pair, Size 42)

S-WORKS EXOS ROAD SHOES

White

Black

At a mere 150 grams, the S-Works EXOS are the lightest cycling shoes to ever come with a Boa® dial. And not only are they ridiculous light, but they still have all the features that are synonymous with the S-Works label. They're still at that World Tour level, just ridiculously light.

- Body Geometry sole and footbed are ergonomically designed and scientifically tested to boost power, increase efficiency, and reduce the chance of injury by optimizing hip, knee, and foot alignment.
- Our lightest FACT Powerline™ carbon plate maximizes power transfer: Stiffness Index 13.0
- A revolutionary Dyneema® Mesh allows us to achieve weight without sacrificing hold for the ultimate connection and comfort.
- BOA® IP1 dial for on-the-fly micro-adjustment, backed by the BOA® Lifetime Guarantee.
- Titanium alloy cleat nuts can rotate to position pedal/cleats 5mm rearward.
- Non-slip, replaceable heel tread with internally recessed screws for security.
- Form Fit last with a Warp Sleeve vamp for the ultimate in connectivity, comfort, and speed.
- Three-bolt cleat pattern fits all major road pedals.
- Approximate weight: 150g (1/2 pair, Size 42)
